PRODUCT REVIEW .COM.AU

The Avanti PLUS® Platinum Series is one of the quietest and most energy efficient split systems on the market. It incorporates an energy saving motion sensor, improved automatic mode for even more precise temperature control and a range of other convenient features and functions. Available in reverse cycle, the Avanti PLUS® is perfect for small to medium spaces.

MOTION SENSOR & ECO OPERATION
Automatically adjusts the set temperature based on human activity detected in the room. Switches the unit off when no activity is detected to save energy.
3D AUTO MODE
Activates three independent motors which deliver an effective and efficient airflow throughout the room.

SILENT OPERATION
Set periods of time where the unit will operate with even further reduced noise levels.

CLEAN AIR TECHNOLOGY
Captures allergens such as dust, pollen and fine smoke particles before neutralising them and any odour causing bacteria and viruses while also inhibiting growth of mould within the unit.
